

Why isn't everyone using this?

Take React Native on desktop seriously

In 2025

- Version 0.81
- Fabric support
- New docs

It's really good

- Small binaries
- Really fast
- Low CPU and memory usage

@vashishtaditya_

@GergelyOrosz @v0
@FernandoTheRojo What!? Didn't
know it was built with Expo/React
Native. Felt so native 🤖

Storybook

RN Ecosystem

- @gorhom/portal
- Async Storage
- Gesture Handler
- Legend List
- MMKV
- Nativewind
- React Native Clipboard
- React Native SVG
- React Native Webview
- Reanimated
- Skia
- WebGPU

Desktop Features need libraries

- Capture screen / other apps
- Context menus
- Dock icon
- Dropdowns
- Keyboard handling
- Media playback
- Menu bar
- Processes
- Stoplight buttons
- Window management

Downsides

- Expo CLI doesn't support macos (yet)
- Some libraries don't work on macos
- Desktop specific functionality needs native modules

Take React Native on desktop seriously

- Add macos support to your libraries
- Try making apps
- Talk to me
